JCOSE – Open Access Journal of Coastal and Offshore Science and Engineering

Call for Papers

JCOSE is an online Journal for the interest of engineers, geologists, ecologists, geographers, oceanographers, scholars and specialists in the fields of oceanography, coastal development, ecology, management and protection. The Journal provides **new insights on coastal, port and offshore processes, function, design, performance, management, monitoring and restoration** from an integrated, multi-/inter- disciplinary, multi-trophic and sustainable perspective.

The *Journal of Coastal and Offshore Science and Engineering* welcomes **research and field case papers** based on a wide range of topics by means of field/laboratory experimental campaigns and remote sensing technology as well as mathematical and numerical modelling.

The Board of Editors is interdisciplinary and multinational, reflecting the composition of the research community the Journal will serve.

The journal is not-for-profit, it is **completely open access** and, after acceptance, articles will be **published free of charge**. The open access format of the Journal means that all articles will be made freely available worldwide immediately upon publication.

A streamlined **peer-review process**, overseen by the prestigious international team of Editors, ensures the high scientific quality of publications.

Authors who are interested in submissions must be **registered to JCOSE**. Registration gives access to a personal page where to perform all the actions connected with the stages in the editorial procedure. Registration is easy and free of charge. Please follow the **Guide for Authors** :
